```javascript
const skills = [ 'JavaScript','React','Redux','AngularJS','Node.js/Express','Git','HTML',
'MongoDB','MySQL','Bootstrap','Swift','Backbone','CSS','jQuery','Mocha/Chai','Agile/Scrum' ]

// WHAT I'VE BUILT
let Bair_Data = {   // thebairdata.com
  description: "Bair Data crunches eBay sales data to show top brands and items to improve market
  research for eBay resellers.",
  focus: "Full-Stack Creator",
  achievements: [
    "Utilized MongoDB for storing data retrieved with eBay API calls to multiple categories",
    "Overcame a restricted API using async await to construct an organized and robust data set",
    "Incorporated a Cron job to do the API calls and data sorting server side to improve UX" ]
}

let Rentopia = {   // www.myrentopia.com
  description: "A UX focused platform for managing Landlord/Tenant communication and needs.",
  focus: "Front-End",
  achievements: [
    "Enhanced relational data among user platforms using Redux with React",
    "Implemented all React components with Bootstrap/CSS to provide a mobile friendly UI",
    "Established a messaging system between unique users and multiple threads" ]
}

let LifeTime_Capsule = {   // github.com/ericdfanning/LifetimeCapsule
  description: "Capture and save life's moments through multimedia for you or the next generation.",
  focus: "Front-End",
  achievements: [
    "Implemented front-end AngularJS web app allowing viewable and editable content by the user",
    "Constructed dynamic RESTful API requests for data retrieval and user login and signup" ]
}

let MY_OTHER_APPLICATIONS = {
  10-43: "Creator | Built mobile app allowing searchable work-related data using Parse storage and
  CoreData in Swift.",
  Easy_Budget: "Creator | Implemented a Parse, cloud based, mobile budget app for simple budget
  keeping using Swift.",
  Price_Compare: "Creator | Developed a Swift mobile app to keep track of prices across grocery
  stores using CoreData.",
  Concreet_Cal: "Front-End | Designed intuitive UI for calendar event editing via dynamic React
  modals connecting to Google's calendar API.", // github.com/ericdfanning/concreet-legacy
  ODIGAT_Tat: "Full-Stack | Architected single-page MERN app for intuitive UI to share and keep
  track of tattoo ideas." //github.com/ericdfanning/hratx28-mvp
}

// EXPERIENCE
const Racine_Police_Department = { // Police Officer - Racine, WI
  description: "Utilized critical thinking, problem solving, and communication skills in high
  stress environments with a team to serve a diverse community of people." }

const ExploreUSA_RV_Supercenter = { // Sales & Finance Representative - Kyle, TX
  description: "Provided RV knowledge to customers while listening to their needs to deliver the
  right product and the best financing options available to make it happen." }

// EDUCATION
const Hack_Reactor = "Advanced Software Engineering Immersive" // 2017
const University_of_Wisconsin_Parkside = "Bachelor of Arts in Criminal Justice" // 2009
```
